

## COLLAPSIBLE MAINLINE TEST & SEAL PACKERS

These Large Diameter Mainline Packers can be dismantled for introduction through accesses as small as 21" in diameter and easily re-assembled. A soft natural rubber sleeve, covering the two end bladders, secured to the supporting shell, provides a non-stick surface and a superior seal against rough surfaces. These packers are equipped with large wheels for easy movement. For better guidance, two extra sets of wheels can be added without modifications.

A sensitive bladder transmits the chamber pressure through a line where a gauge or a transducer can be installed on the outlet.

PART #	SIZE (inches)	APPROX. PACKER O.D. (inches)	APPROX. WEIGHT (lbs)	LENGTH WITHOUT WHEELS	LENGTH WITH WHEELS	APPROXIMATE VOLUME OF THE GROUT MIXING CHAMBER
CMP-24	24"	20"	125 lbs	21"	48"	1.7 liters
CMP-27	27"	23"	135 lbs	21"	48"	1.9 liters
CMP-30	30"	26"	166 lbs	21"	48"	2.1 liters
CMP-33	33"	29"	177 lbs	21"	48"	2.3 liters
