LOGIBALL LATERAL LAUNCHER

CLEAN LATERALS FROM THE MAINLINE SEWER

The Lateral Launcher guides your 1/2" hose and nozzle into the lateral connection from the mainline sewer. Winched in tandem with the cctv camera, the 0-90 vdc motor is used to rotate the guiding arm and nozzle into the lateral connection. With the pump turned on, the back jets propel the hose into the lateral for cleaning.

2 models available:
8" lateral launcher: - Comes with assembly for use in 8" thru 18" pipes.
  - 0-90 vdc motor (operated from the tractor controls of the cctv multiconductor cable)

6" lateral launcher: - Single size
  - 0-24 vdc motor

Common features:
Stainless steel
Replaceable guiding arm
Available with industry standard 3 pin or 4 pin male connector
Optional nozzles and hoses available
