

## FLOW CONTROL EQUIPMENT: **HYDRANT FLOW DIFFUSER**

Keep the flow under control when flushing fire hydrants.

### **PRODUCT DESCRIPTION**

Logiball Fire Hydrant Flow Diffuser keeps the flow under control while rinsing hydrants for waterline maintenance. The Flow Diffuser slows down water velocity without affecting the flow. The water stream hits the end plate, changes direction and flows out slowly.

### **KEY FEATURES**

- ◌ Helps avoid the washout of the surrounding ground.
- ◌ Easy to handle and to carry.
- ◌ Drastically increase the rapidity and the security of rinsing fire hydrants.
- ◌ Various lengths of hose available.
- ◌ Various type of hydrant adapters (QST, NST, etc.) available on the hose.
